

Pacific Forest Rally, Bulletin #2
Wednesday September 28, 2011

1) Regional events and Parc Fermé

The end of regional #1 is ATC17, on the entry to service #2. The start of regional #2 is ATC20, on the exit of service #3. Parc fermé is therefore not required for regional teams that are not registered in the national.

For teams that are registered in the national, see NRR VI.H for the rules governing parc fermé.

2) Overnight Noise

Whether or not your car is in parc fermé, please keep the noise to a minimum during the overnight hours. There were complaints last year from local residents about noise from 2am engine testing.

3) Fuel for Saturday morning

The total distance from the start of Saturday's route to the first service is over the 150km maximum interval. For those teams who are not entered in the PIAA eco challenge who will need additional fuel to complete this distance, there will be an optional re-fuel zone at instruction 12 (28.47km) in the transit to SS8, on page 51. If you wish to use this re-fuel zone, please sign up before 9:00am Saturday, on the sheet on the notice board.
